5 One annna per month is a very fair rate & allows a good margin of profit to the Elec. true depth - It may be adopted.

Now that the whole maintenance charges of the Mysore water supply will be ~~cha~~ debited to Government the question what is the proper rate to be charged for the supply of power, loses much of its significance

Submitted.

The Main file relative to the appointment of the Maintenance Charges of the Mapusa City Water Works has reach to Rs. II on the 26th May last for the Secretary's opinion on the financial aspect of the Municipality. As this decision about the scale of royalty to be charged for the electric power supplied to the Belagola Temples will have to be taken into consideration in fixing the scale of the Municipal Councils habitation towards those charges. May this file be forwarded to Rs. II on Continuation?

C S Balasundaram Iyer Esq ,B A ,
Offg:Secretary to the Government
of His Highness the Maharaja of Mysore,
General and Revenue Departments

SIR,

With reference to correspondence ending with your letter No 7810/Ml 421-07-26 dated the 7th ultimo, stating - that the subject of the payment of royalty by the Mysore City Municipality for electric power supplied to the Belagola Pump--ing Plant is under the consideration of Government, I have the honour to forward the enclosed copy of letter No 665 dated the 24th February last from the Chief Electrical Engineer suggesting that the rate to be charged in this case should not be less than one anna per unit, that being the rate at which power is supplied to the Madras and Southern Maratta Railway workshop under a special agreement

2 In the absence of definite orders, the Chief - - Electrical Engineer is preparing his bills for the power sup--plied to the Pumping Plant at Belagola at 2½ annas per B T U, the rate sanctioned for private consumers The Executive Engineer, Water Supply and Stores Division has brought to notice that the bills at this rate total up to a considerable amount and that he is unable to accept them My personal view is that the rate charged should be the same as that fix--ed for the Bangalore Jewell Filter Plant, viz , 6 pies per unit

SUBJECT

The favour of very early orders is solicited

I have the honour to be,

Sir,

Your most obedient servant,

M Visvesvaraya

Chief Engineer of Mysore

Letter no 665 dated the 24th February 1910 from the Chief Electrical Engineer to the Govt of Mysore, to the Secretary to Govt Public works Department.

Belagola Pumps

With further reference to my letter no. 634 of the 22nd instant, asking for favour of an early settlement regarding rate to be charged for the Belagola Pumping in Mysore, and for similar work at the Filter-beds in Bangalore, I have the honor to suggest that these rates shall not be made less than that charged for the M & S M Railway Supply, which is also under special agreement at the rate of one anna per unit. I make this proposal as we understand that the Civil and military Station will pay half the cost of the Bangalore Supply, and there seems no apparent reason for selling the power to them more cheaply than we do to other outside customers.

Signed by Turkm.

Sir,

With reference to your letter No 2989 dated the 2nd April 910 and subsequent reminders about the rate of royalty to be charged for the electric power supplied to the Belagola Pumps, I am directed to inform you that it should be one anna per unit the rate charged to the Railway — and that this rate may hereafter be adopted.
